To: Gottfried Haider <gottfried.haider@gmail.com>

Hey Gottfried,

The piece was cut in two separate stages.

The first stage, when all the tiny boxes are cut out has settings:
POWER: 8%
SPEED: 50%
PPI: 1000
Z-axis: .004"

The second stage, when the larger boxes were cut out has settings:
POWER: 12%
SPEED: 20%
PPI: 1000
Z-axis: .004"

they're also saved in the saved laser settings as dark-game controller2.las and dark-game controller_bigbox.las respectively.

Cheers,
Sabrina
